

**Department of Computer Technology****Vision Statement of the Department.**

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027

Vision: Dream of where you want.	Mission: Means to achieve Vision
---	---

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Name and Signature of Student and Date

(Signature and Date in Handwritten)

Nagar Yuwak Shikshan Sanstha's

Yeshwantrao Chavan College of Engineering

(An Autonomous Institution affiliated to Rashtrasant Tukadoji Maharaj Nagpur University)

Hingna Road, Wanadongri, Nagpur - 441 110

NAAC A++

Ph.: 07104-237919, 234623, 329249, 329250 Fax: 07104-232376, Website: www.ycce.edu

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session	2024-25 (ODD)	Course Name	Web Technology Lab
Semester	3	Course Code	23CT1301
Roll No	22	Name of Student	Sanskriti Kharapkar

Practical Number	4(B)
Course Outcome	1. Understand various internet technologies. 2. Design the web pages using HTML and CSS. 3. Implement the XML technology to store the data. 4. Develop the interactive web pages using JavaScript.
Aim	To Study DOM (Document Object Model) Manipulation
Problem Definition	Build a To-Do List web application where the user can: ● Add a new task ● Delete an existing task ● Mark a task as complete
Theory (100 words)	DOM (Document Object Model) DOM stands for Document Object Model. It represents an HTML webpage as a tree of objects. JavaScript can use the DOM to access, modify, add, or remove HTML elements dynamically. Using DOM manipulation, we can: ● Change HTML content ● Change CSS styles ● Create new elements ● Delete elements ● Add event listeners ● Respond to user actions

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Procedure and Execution (100 Words)	Step for Implementation: ● Create an HTML page containing a To-Do List. ● Add an input box to enter a new task. ● Add an Add Task button. ● Create an empty list where tasks will be displayed. ● Use JavaScript to get the input value. ● Create a new <code></code> element using <code>createElement()</code>. ● Add the task text to the list item. ● Add a Complete button to mark the task as completed. ● Add a Delete button to remove the task. ● Use DOM methods such as <code>appendChild()</code>, <code>remove()</code> and <code>classList.toggle()</code>. ● Display the updated task list dynamically.

Output Analysis	The To-Do List application successfully performs all the required operations. JavaScript DOM methods are used to dynamically create and add new tasks to the webpage. The Complete button uses <code>classList.toggle()</code> to mark a task as completed, while the Delete button uses <code>remove()</code> to delete the task from the DOM. Thus, the webpage changes dynamically without reloading the page.
Link of student Github profile where lab assignment has been uploaded	Sanskriti2007-code/web-Technology-Practicals
Conclusion	The To-Do List web application was successfully developed using HTML, CSS and JavaScript. DOM manipulation was used to create, modify and remove elements dynamically. The application allows the user to add new tasks, mark tasks as complete, and delete existing tasks, demonstrating the practical use of the Document Object Model.
